Organization

OF THE

CITY GOVERNMENT JANUARY 1, 1906.

The Mayor and Council met at the council room on the afternoon of the first Monday of January, 1906. Mayor Shepard called the Council to order at 7.30 o'clock. After hearing the records read by City Clerk Daniell, Mayor Shepard read the balance sheet, showing the indebtedness of the city to be \$164,107.80. City Clerk Daniell read the list of appropriations and expenditures for the past year. On motion of Councilman Draper, the Council of 1905 adjourned.

Chief Justice Frank N. Parsons administered the oath of office to Mayor Willie L. Whittier, who administered the oath of office to the Councilmen-elect George S. Davenport, George E. Clark, William W. Edwards and Eugene W. Leach.

Mayor Whittier then delivered the following inaugural :

"Gentlemen of the Council—I am pleased to find the affairs of the city in a prosperous condition. At the end of the fiscal year, 1904, the net debt was \$141,755.32; at the close of business for the year 1905 our books show a net debt of \$164,107.80. The increase in debt is accounted for by notes of \$25,000 issued for the extension of our water works. Deducting this as an extraordinary expense our debt has been reduced for the year \$4,581.41. For a more detailed account I refer you to the city reports, but will call your attention briefly to some of the departments.

"We thought we had solved the question of how to make good roads by the appointment of a state engineer, but our experience of last year did not seem to bear this out. I should recommend, if the city needs to build roads, that we build them ourselves and not pay \$1000 for \$800 state money.

"Our Fire Department continues to be one of the best in the state and will probably not require any special appropriation this year. For the Police Department I am not prepared to give much advice; but it seems to me that the Marshal should patrol the streets more regularly and remember that the city ordinances were passed in good faith and must be respected.

"The question of street lighting will come before you during the year, the present contract expiring Dec. 31. Action should be taken early, so that the Council may be fully prepared before the matter is finally decided. It cost this department last year about \$4500. New lights should be granted only after a thorough investigation, keeping in mind the fact a petition for lights once granted means an expenditure not alone for this year, but for all time.

"By the terms of our charter, the control of our schools and water works is vested in a Board of Education and Water Commissioners respectively. You will be called to elect one member of the Board of Education for three years and two Water Commissioners. Your duty will be the selection of persons best fitted for those positions.

"In conclusion, I wish to thank the citizens of Franklin who assisted in my election to the highest office in the city, and I promise that I will perform the duties of the office to the best of my ability, without fear or favor."

City Government.

Organized January 1, 1900.

CITY COUNCIL.

Mayor.

Elected annually on the fourth Tuesday of November. Salary \$200 per year.

WILLIE L. WHITTIER.

Councilmen.

Elected by wards for three years. One member from each ward elected on the fourth Tuesday of November annually. No salary.

		Term Expires.
<i>Ward 1</i> —SAMUEL B. CHADWICK,	.	January 7, 1907
MILTON B. NEAL,	.	January 6, 1908
GEORGE S. DAVENPORT,	.	January 9, 1909
<i>Ward 2</i> —ALBERT S. EASTMAN,	.	January 7, 1907
HECTOR MORIN,	.	January 6, 1908
GEORGE A. CLARK,	.	January 4, 1909
<i>Ward 3</i> —EUGENE W. LEACH,	.	January 7, 1907
HARRY F. DAVIS,	.	January 6, 1908
WILLIAM W. EDWARDS,	.	January 4, 1909

Highway Department.

HIGHWAY COMMISSIONERS' REPORT.

To the City Council of the City of Franklin:

I herewith submit the following report as Highway Commissioner of the City of Franklin for the year 1906:

Two thousand feet of new street has been built on the Clark Farm. Three hundred and fifteen feet of bank wall has been built on Cheney Hill.

Outside roads, bridges and culverts are in thorough repair. The streets in the city have all been repaired except the macadam.

J. R. SMITH,

Highway Commissioner.

Highway Department as Estimated Dec. 31, 1906.

Fire Department.

ENGINEER'S REPORT.

To the Hon. Mayor and Council of the City of Franklin:

I herewith submit my annual report for the year 1906.

The department consists of a chief engineer and four assistants; hose company No. 1, Capt. Ned Flanders, 10 men; hose and steamer company, John McLaughlin, 15 men; hook and ladder company, John Cunningham, 15 men; total of 45 men.

The equipage of the department is as follows:

CENTRAL STATION.

One one-horse hose wagon, in good order.

One two-horse hook and ladder truck, in good order, with runners for the same.

One Amoskeag steamer, in good order.

One new one-horse sled.

1,500 feet good two and one-half inch rubber lined hose.

HOSE COMPANY No. 1, SOUTH MAIN STREET.

One one-horse hose wagon, in good order.

One hand reel.

One hand sled.

One hand engine, in good order.

1,000 feet good two and one-half inch rubber lined hose.

No. 3 hand reel, located in hose house opposite No. 1 paper mill on Central street, has 350 feet good two and one-half inch rubber lined hose.

No. 4 hand reel, located in hose house off Pine street, in the rear of Pine street, has 400 feet good two and one-half inch rubber lined hose.

No. 5 hand reel, located in hose house on Pearl street, at the head of Park street, has 400 feet good two and one-half inch rubber lined hose.

All of these pieces of apparatus are supplied with necessary pipes, wrenches, axes, etc.

There is also located in, under the stable of Clark & French's, a truck with one 55-foot extension and one 24-foot roof ladder. There are two pony extinguishers at Clark & French's stable, two at the city hall, one at the passenger station on Depot street, and one at G. H. Barnes' stable, belonging to the department and should be used by anyone who should discover a small fire in any of these locations.

During the year a new hose wagon has been bought and placed in the central station, and the one formerly located there has been thoroughly repaired and painted and placed in the house of Hose Co. No. 1 on Main street. During the year the fire alarm system has been thoroughly overhauled and put in first-class shape. The old gravity battery has been taken out and a storage system put in, located at the Light and Power Co.'s plant, and charged by them. A new fire alarm box has been installed at the junction of Pleasant and Orchard streets and Mrytle avenue.

There has been put in the central engine house a new indicator, showing, in plain figures, the number of the box rung in.

A new harness has been made by G. O. Thompson and hung in the hose house on So. Main street.

During the year there were 42 still and 21 bell alarms.

LIST OF FIRES.

1906.

January 3. Still alarm for chimney fire, Kelley Bros.' house, Franklin street. No loss.

January 18. Still alarm for chimney fire, Wm. Franklin's house, Central street. No loss.

January 27. Still alarm for chimney fire, David Cushing's house, Railroad street. No loss.

January 31. Still alarm for chimney fire, E. M. Smith's house, Maple street. No loss.

February 2. Still alarm for chimney fire, Tobin's house, Bow street. No loss.

February 3. Still alarm for chimney fire, B. Lemire's house, Canal street. No loss.

February 4. Still alarm for chimney fire, Sulloway house, Elkin street. No loss.

February 7. Still alarm for chimney fire, J. F. Daniell's house, Central street. No loss.

February 7. Still alarm for chimney fire, Mrs. T. Igo's house, East High street. No loss.

February 16. Box 25, Atkins' blacksmith shop. Loss, \$1,400.

February 26. Still alarm for chimney fire at Corrigan's house, Elkin street. No loss.

February 12. Still alarm for chimney fire at E. G. Leach's house, Franklin street. No loss.

February 28. Box 25, fire at Franklin mills. Loss, \$210.71.

March 9. Box 22, fire at Glines & Stevens' shop, Elkins street. No loss.

March 14. Box 25, fire at F. M. Edmunds' house, Highland avenue. Loss, \$616.

March 23. Still alarm for chimney fire at J. R. Smith's house, Prospect street. No loss.

April 2. Box 16, fire at Congregational parsonage. No loss.

December 24. Box 25, fire in block of James Eaton on Central street, occupied on first floor by Cherrier & Morrill, stoves and tinware; 2d and 3d stories used as tenements. Building valued, \$3,500; building insured, \$2,500; loss on building, \$300; insurance paid on building, \$300. Stock of Cherrier & Morrill valued, \$3,500; insurance on stock, \$2,000; loss, \$106; insurance paid on stock, \$106.

In closing, we would offer the following recommendation that some arrangement be made, whereby steam could be had for the fire alarm at all times. For as the report shows, the only serious fire of the year happened on Sunday, when there was no steam on the gong.

Would recommend that at least one new alarm box be added to the system each year, for a few years, until the city is more thoroughly equipped.

That regulation fire hats be provided for pipe men and axe men of the department, as their work is the most dangerous.

Some new hose should be added to the department this year. We should suggest that the horse and driver of the hose wagon be kept at the engine house nights.

In closing, we wish to thank the City Government for their support; also the Highway Department for their co-operation, for without their assistance, it would have been impossible to have done our part of the work as well as we have.

NED BUNTON, *Chief.*

GEORGE F. GARNEAU, *1st Assistant.*

HARRY E. COLBY, *2d Assistant.*

C. H. BEAN, *3d Assistant.*

JAMES W. HUNTOON, *4th Assistant.*

	Cash in Franklin Savings Bank, book No. 8574,	\$1,176 44

CITY SOLICITOR'S REPORT.

To the City Council of the City of Franklin:

The city has been fortunate during the year in having no claims or suits brought against it, excepting that suit was brought on claim of G. S. Farnum, referred to in last report, which was settled by the council with my approval, for the sum of one hundred dollars, and a small claim of George W. Snow for damages received in the covered bridge, which was settled by the council for five dollars and twenty-five cents.

EDWARD G. LEACH, *City Solicitor.*

FINANCE COMMITTEE'S REPORT.

The Committee on Finance have checked off the interest coupons paid during the year, amounting to \$3,116.25, and the funding bonds of 1899, Nos. 21, 22, 23, 24 and 25, amounting to \$5,000.00, and have destroyed the same.

WILLIE L. WHITTIER,
GEORGE E. CLARK,
SAMUEL C. CHADWICK,

Finance Committee.

POLLS, VALUATION, AND TAXES ASSESSED.

The number of polls, and the tax assessed on the real and personal estate in the city of Franklin since 1895:

							\$31,463	55

							\$53,681	97

Water Rates.

All customers are supplied through meters. The minimum charge is six dollars per year, which entitles the consumer to 2,000 cubic feet during the year. Rentals are collected quarterly. For the first 1,000 feet or less in each quarter the charge is 30 cents per 100; for the excess over 1,000 feet used in each quarter, 20 cents per 100 feet is charged.

Upon all quarterly bills exceeding \$12.50, a discount of 50 per cent. of the excess over \$12.50 is made.

No charge is made for private hydrants or for automatic sprinkler service.

Water Supply.

The quality of the water from the wells, which were put in a year ago, appears to be entirely satisfactory. The quantity has not been as large as was hoped for. The pumps were started on the new system Dec. 20, 1905. From those wells and the Coldbrook system the entire supply of the city was obtained until September 24.

At that time, because of an accident to the machinery, it was necessary to pump water from the Winnipiseogee river for 24 hours, of which notice was then given. Since that date, it has been necessary, by reason of the long continued drouth and the unexceptionally heavy consumption to supplement the supply from the springs and wells, by drawing a small amount directly from the Penigewasset river. The amount pumped during the year is greater than in any year except 1893. While the amount used has increased, considerable of this demand was without doubt due to concealed leaks in the system. Many have been found and remedied, and at the present time, in spite of the long continued drouth, the wells and springs are supplying the city without taking any from the river. But it is to be expected that in the absence of rain some water must be drawn from the river at times until the spring opens. The supply during the time the river has been drawn upon has given a remarkably good chemical analysis. While the *colon bacilli* reaction appears, there is nothing in the situation to lead to the inference that the water is not suitable for domestic use. Considerable work has been done in improving the supply from the wells on the land obtained from Mr. Giles. Another season, such an extension of the system for collecting the water from the ground can be made, that under all ordinary conditions sufficient water will be obtained from the wells and springs to supply the city. From one-half to two-thirds of the whole supply must come from this source, and as we are dependent entirely upon the pump in the Pemigewasset station, reasonable prudence would seem

to require duplicate machinery at this station. Also all apprehension arising from the use of water directly from the river can be avoided if some method is provided for filtering such water whenever the supply from the wells is insufficient. With these additions to the system as now constructed, the water supply will be ample in quantity, and not only superior as to quality, but above suspicion. The expense of additional wells and a new pump can probably be met from the income of the department the coming year, but a filter plant would require an additional investment.

FRANK PROCTOR, *Treasurer.*

SUPERINTENDENT'S REPORT.

To the Board of Education:

I herewith respectfully submit my sixth annual report, which is the sixth in the series of reports of the Superintendent of Schools in Franklin. Before entering upon the details of the report it is my pleasure to extend to the Board of Education thanks for the kindnesses and the courtesies which they have shown me during the past year. To the kindly attitude of the Board and of the citizens of Franklin I owe more than five years of pleasant labor in the public schools of this city.

As we come to review the work of the past year, which in itself is not materially different from that of many others, we are prone to ask, "Why does this great system of the public schools exist?" Year after year several hundred thousand dollars are expended within the state of New Hampshire alone for the maintenance of public schools. If the matter is carefully studied it will be found that the school system is not so distinctively a local institution as are many other departments of city government, but rather that it is a part of a large state system. In fact the public schools exist for the protection of the state, and the state claims them largely as her own. Many other nations, believing that national or state safety depends upon force of arms, expend vast sums upon standing armies. The theory of our state is more ideal, for it believes that its safety rests in the intelligence of its citizens. It is not, then, the education of the individual that it sought, but rather the training of the average child that will make him the best citizen. This is the primary reason why so much time and money are expended upon the public schools. This is the reason why the state makes laws governing the attendance of children, prescribing studies, determining the amount of money to be raised, and otherwise regulating their management.

ATTENDANCE.

In another part of this report there is printed a table of attendance. It will be noticed that for the year the per cent of attendance has been very good. The average for all the schools is over 90. The high school leads with a yearly average of 97 per cent. A good per cent of attendance is excellent and is to be greatly desired. This same table shows an unwarrantable number of tardy marks for many of the schools. The tardy habit is bad. It is demoralizing to the schools, but more especially to the individual child. The child, who through his own fault, is frequently tardy, must lack interest in his school or have but little genuine school spirit. Unfortunately this attitude of the pupil is in many cases the fault of the teacher. Ordinarily the record of a good teacher will show punctuality. As a matter of fact a large per cent of the tardy marks are due directly to the indifference of parents to the virtue of punctuality. Parents are doing their children great harm if they encourage or even allow habits of tardiness. It is hoped that for the benefit of the schools and the children parents will co-operate with teachers in the endeavor to increase the punctuality of the schools.

In this connection attention is called to the honor list in another part of this report. To have their names on this list shows a persistent effort on the part of the children. But as none of those whose names appear knew that the list was to be printed, the effort they put forth must have sprung from a deeper motive than the mere desire for honor. These children have shown an interest in school work which is worthy of commendation. The list is a credit not only to the pupils whose names it contains but also to the teachers and the schools.

PROGRAM OF STUDIES.

A few changes have been made in the program of studies. The course in Physiology and Hygiene has been amplified,

and new, up-to-date text-books have been bought. The course is now so arranged as to give the children clear and valuable knowledge of the subject matter as well as to amply cover the requirements of the law.

For several years the extreme spiral method has been used in teaching arithmetic. This seems very satisfactory with the children of the lower grades, but in the upper grades there seems to be a demand for more grouping of the subject-matter under definite heads. The method which has been in use brings the pupil into contact with several phases of the subject of numbers in a single lesson. This causes the minds of the children too frequently in a short period of time to shift their attention from one process to another. This, I believe, has a tendency to weaken the power of application and concentrated attention, the school virtues especially required in the teaching of mathematics. Moreover the text-books of the system are inefficient for reference. The subject-matter is so scattered that there is no opportunity for reference to a certain operation.

The idea that the child should be introduced to the whole range of a subject as his power of understanding will admit is naturally and psychologically correct. Its application, however, to the teaching of arithmetic must be modified somewhat after the fourth year of school work. At the beginning of the fifth year the work and explanations of the different arithmetical processes should be grouped so that the child may have opportunity to fix these processes definitely in mind. This is by no means a return to the old idea that fractions must be taught in the fifth grade, denominative numbers in the sixth, percentage in the seventh, and so on, with no other reference to these subjects at any time or place except as previously designated. There should be many and frequent reviews and much oral work.

In order to bring about desired results, new arithmetics are being used which have an arrangement of subject-matter bet-

ter adapted to the needs of our schools. The new method is being tried in several grades, and meets with the approval of pupils, parents and teachers.

Perhaps no one subject in our program of studies is so unfairly criticised as is the course in music and the results obtained. The public schools do not pretend to give any individual child extensive instruction in music. But I do believe that the children of the Franklin schools are as proficient in this subject as could be expected from the amount of time put upon it. The work, as may be seen from a careful study of the supervisor's report, is conducted with most approved modern methods. I recommend to your careful attention that report.

SCHOOL ACCOMMODATIONS.

In the last annual report the need of more school accommodations was carefully explained. The city has generously met this need. The hall on the third floor of the High School building has been divided into four large, well-lighted rooms. Two are used by the high school, one as a physical and chemical laboratory, the other as a recitation room. One room is used for drawing, and one is not yet occupied.

The equipment of these new rooms has not yet been fully attended to. The apparatus for the physical laboratory is approximately adequate to the present needs. The chemical equipment, however, has not received the attention that should be given to such a department in school work. The present recitation room on the third floor could be converted into a chemical laboratory and still be used for the same purposes as at present. In the last report attention was called to the possibilities of an "Alumni Chemical Laboratory." If the alumni should deem it best to expend money in this direction they would confer a lasting improvement upon the school and a benefit upon every pupil enrolled. The city will probably continue to furnish chemicals and the necessary apparatus for

courses in chemistry for years to come, but a great many years must elapse before the city, on account of expense, can properly furnish a room with the equipment which is of such great advantage to the teaching of scientific chemistry. A well furnished room should have benches piped for gas, sinks with running water, and sewer connections, and a large number of individual lockers and drawers. A room thus equipped would represent an outlay of several hundred dollars, and when completed would be an honor to the donors.

The drawing room has not yet been fully furnished. Cabinets, individual tables, good chairs, blackboards and artists' models are mostly wanting. Two hundred fifty or three hundred dollars can be very profitably spent upon the furnishing of this room.

The one room that still remains unused may soon be required for one of the grades. Last fall the need became almost imperative. The first grade at the Falls numbered about fifty, which was too many for one teacher; the kindergarten enrollment was thirty-five, some of whom were better fitted, on account of age and ability, for the first grade; while there were several others in the second grade who were doing work beyond their ability. The solution would have been to establish another primary room. Such action may have to be taken next spring. When the necessity comes for using the upstairs room, one of the upper grades should be moved up, as older children are better able to travel up and down the stairways. The necessary furniture is already on hand, so the cost of equipping when the need comes will be slight.

The hall on the third floor with the new rooms is commodious, warm, fairly well lighted, and is provided with modern lavatories.

All the schools in the city now have good accommodations. In the cases mentioned above, some furnishing may be done to advantage, and from time to time other slight changes may be

made. However on the whole the city is to be congratulated on the ample quarters which have been provided for the schools, and which will be sufficient for several years to come.

HIGH SCHOOL.

As has been mentioned elsewhere in this report, the high school is provided with ample accommodations, though their equipment might be somewhat extended and improved. The enrollment is somewhat larger than ever before and will probably continue to increase for two years when it will again depend upon the fluctuations of the population of the city.

During the last two years, the teaching force of the high school has not maintained a desirable stability. No less than six new teachers have been employed in that time. Several of the changes have taken place at such a time as to cause great inconvenience to the school. In order to check these changes it will probably be necessary to make a more liberal salary schedule, and so be able to offer greater inducements for good teachers to remain.

In spite of all obstacles, however, the school has continued to grow in numbers and maintain an excellent standard. Mr. H. P. Swett is now in the second year of his efficient work. The results of his labors for the past year and his future plans will be found in his own report in another place.

HIGH SCHOOL TUITIONS.

It may be of interest to many to note the rapid increase during the last four years in the amount of high school tuitions. In 1903 the amount received by the treasurer was \$60; in 1904, \$155; in 1905, \$502.50; in 1906, nearly \$650. The charge for high school tuition is at present \$35 per year, \$15 for the fall term, and \$0 for each of the others, and is based on the annual average expenditure per pupil. Some of the tuitions are paid by private parties, but most of them, in accordance with the high school tuition law, are paid by near-by towns.

During the past year the following have been represented: Salisbury, Sanbornton, Grafton, Northfield and Hill, and at different times there have been twenty different pupils. These facts do not mean any great financial aid, but they do speak in emphatic terms of the success of the present high school tuition law and the standing of our high school. The aim of the law was to furnish every child in the state an opportunity to attend, if he so desire, a high school at public expense. It is certainly securing desired results. As far as the standard of our school is concerned, it must be approved and appreciated by the parents of the twenty children in attendance. The attendance of children in numbers from outside towns shows that the school is well known and well spoken of.

SCHOOL GROUNDS.

During the past summer and fall the grounds about the high school building, owing to the rebuilding of the high school hall, the establishing of the central heating plant, and the work of concreting the walks, have not presented as good an appearance as they would otherwise have done. It is hoped that in the spring something will be done to put them in better condition. A great deal of concreting was done last year at the expense of nearly \$175. This would seem to be rather out of proportion to other expenditures. The landscape architect under the auspices of the Village Improvement Society made plans of the grounds, and had even a small part of this amount been spent in accordance with these plans, far greater results for beauty might have been attained.

The play grounds should not be taken away from the children, but about every school building there are many nooks and corners that might be beautified. Many places could be graded and seeded. Such improvements could be made on quite an extensive scale without much expense to the city, or on a smaller scale by the children.

PUBLIC IMPROVEMENTS.

Since the last annual report the central heating plant has become an established fact. With its advent the noise and dust from handling fuel, and all danger of fire from boilers and furnaces have been taken away. As far as the schools are concerned, the new plant seems to be adequate to meet the demands made upon it. The two school buildings connected with the plant can be easily and sufficiently heated.

On changing the heating system in the small building at the Falls, it became necessary to connect with the sewer and modern flush closets have taken the place of the old ones. These changes are very beneficial.

The library is almost ready to be used and cannot fail to be a most serviceable supplement to school work. It is hoped that its influence on the reading habits of the children will be greatly for the good, and that it will also meet a deep felt need of those teachers who are anxious to continue their educational and professional growth. At an early date special privileges should be granted to pupils and teachers in connection with school work.

EXHIBITION WORK.

Ordinarily exhibition work of any kind does not to any great extent serve the true purposes of the public schools. It may to some degree interest the parents and draw them into closer relationship with the schools and the school work. If so, some good has been done. It may also incite many or all of the pupils for a time to put forth their best efforts to gain certain results and attain a certain standard. Here again some advantage has been secured for the schools. Exhibition work may show the result obtained by a few individual pupils, the results obtained by all the pupils in a very few exercises, or it may show only method with but little reference to the pupils. At best, school exhibitions are incomplete and can never show what is actually being done in the school room.

However they seem to be of sufficient value to warrant their occasional occurrence, and in their various phases have been from time to time undertaken by our schools. They may pass under the title of school exercises, of musicales, or exhibitions, but they all serve to show what may be done by pupils.

Last fall a special exhibition of methods was prepared for the benefit of the Franklin Woman's Club. This seemed to meet with the decided approbation of all concerned. Pupils and teachers labored earnestly to make it a success. After serving its purpose at the Club, it was arranged at the High School building and at the Nesmith, where it was seen and appreciated by many.

UNGRADED SCHOOLS.

At times during the year four ungraded schools have been in session—Call, Pond, Shaw's Corner and Morrison. The Call and Pond should be closed. They are, when compared with the village schools, inefficient and expensive. Their inefficiency is due to the fact that on account of their size only a small amount of money can be expended upon them. Thus they are deprived of the services of special teachers and their regular teachers must be inexperienced and untrained. Each of these schools costs the city at least seven dollars per week, or two hundred thirty-eight dollars. The average membership of each is about five pupils. That is, each pupil in attendance at these schools has expended for his benefit forty-seven dollars and sixty cents. Now in the graded schools about twenty-three dollars and fifty cents is the annual expenditure per pupil. That is, a child in either the Call or Pond school costs the city for schooling twenty-four dollars and ten cents more than a child in the village. This certainly is a deplorable fact when the inefficiency of the schools is considered. At best the schooling of the children in these communities will cost more than the same numbers in the village. Still by transporting them they could gain the advantages of the graded

schools at a considerably smaller figure than is now expended. I would recommend that some responsible person be employed to transport the children of these schools. The team could be started from the Call school house, come down to the road which passes around the north end of Webster Lake, proceed along this road to a point near the Pond school, and from thence to the Nesmith school. This could be done without extra inconvenience to the children and with much reduced expense to the city and in addition to this the children would receive far greater advantages.

The conditions in the Shaw's Corner and Morrison schools are far different from those in the schools first mentioned. During the past year the Shaw's Corner school has had an average membership of fourteen, which would entitle this school to an expenditure of three hundred twenty-nine dollars. As a matter of fact this school receives only about two hundred seventy-two dollars. This school has been fortunate in retaining the services of the same teacher for more than a year. This has given a certain stability which can not be secured when teachers are changing each term.

The Morrison suffers much from frequent change of teachers. This school has an average membership of twenty-two, which entitles it to an annual expenditure of five hundred seventeen dollars, while it receives only about three hundred forty. The greater part of the extra money due this school might well be expended on the teacher's salary. This is the most difficult school in the city, not on account of its size or on account of the number of its pupils, but on account of their varying ages and the necessary number of classes. The teacher in this school must be versatile indeed if she would be successful. She must know everything pertaining to school work from the kindergarten to the high school; she must be able to turn her attention quickly and pleasantly from assisting the mature child to entertaining the little tot who is in school for the first

time. Such a teacher should have natural ability for teaching, a thorough training, and experience. Eight dollars per week, the present salary, will not secure the service of such a teacher. The salary in this school should be sufficient to secure as good service as in the graded schools.

SALARIES.

Two years ago some advance was made in teachers' salaries. I believe that the advance has been very beneficial to the schools. It has resulted in more permanency in the tenure of office. Only three of the teachers of the graded schools left at the end of last year, and two of these left for other reasons than that of salary. It has given new teachers something to look forward to and work for. It induces better teachers to come among us than could otherwise be secured. It gives teachers more money with which to meet the many demands made upon them.

However the salaries have not yet reached a point where they are in just proportion to the labors and sacrifices of the teachers. The cost of living has greatly increased within the last three years; a great deal more is required of teachers both in culture and educational training; more daily work in the school room and out is now expected; and teachers must exert themselves by reading, by travel, by study, and by attending educational meetings to keep in touch with all the best in their profession. The maximum salary of all the grade teachers should be fixed at not less than twelve dollars per week, and the maximum salary of all the high school teachers should be advanced. It may not be possible at once to make all the desired adjustments in salary, but now that the schools are well housed in comfortable, commodious buildings, money can be spent in no better way than for the improvement of the teaching force.

IN GENERAL.

During the year just past, Miss Lucy Nelson, for many years supervisor of drawing in the Franklin schools, resigned. The city is to be congratulated for having been able to retain the services of Miss Nelson for such a long time. Her efficient work and tactful management placed the drawing in the schools on a very high plane. Her long term of service makes it especially appropriate that this report should express appreciation of her work and regret at the loss of her services.

Since last September there have been only two grades, seventh and eighth, in the Nesmith grammar school. This is a condition which it is hoped can be continued from year to year. At present the seventh grade is so large, and made up two divisions so far different in mental power, that it has been necessary to continue the services of Miss Closson as an afternoon assistant. Another year, if the numbers in the Nesmith school continue to increase, it may be best to employ a teacher for a full day in charge of a room instead of a half day assistant.

As yet it has not seemed advisable to establish a course in manual training. Most other towns and cities of the state of the same size as Franklin are doing something along this line. Franklin should continue to be mindful of this need and embrace the earliest opportunity for developing some simple course in manual work.

The school children of Franklin are still trained in the vertical system of writing. This system has done much to simplify penmanship for the average child. It has simplified the form of the letters and added much to the neatness of the written page. There is at present a tendency in many places to adopt a medial slant system of some character. As yet, no definite slant system seems to meet the approval of even a majority of school officials. Whatever the final outcome of the present agitation in regard to penmanship, it is certain that the simplified forms of the vertical system will remain. While doubt-

less in the future the city will adopt a slant system, there is no reason why we should hasten to make the change until educators shall come to a more definite agreement in regard to what is best.

A new system of signals for closing schools has been inaugurated. The principal feature of this is that it provides a method by which the smaller children may be dismissed while the larger ones remain in session. There are many times when such an arrangement is advisable as little children are less able to endure inclement weather. The direction for the blowing of the signals is printed at the end of this report.

IN CONCLUSION.

This is in brief an outline of the work of the public schools of the city. At the beginning of the report, attention was called to the fact that the schools existed for the development of children for citizenship. In order to obtain the highest type of manhood and womanhood, the physical and mental development of the child must be accompanied by character development. To meet the desires of the state, the schools must give the children will training. It is the duty of the schools to see that the children are taught to act promptly, accurately and truthfully. As far as is within the power of the superintendent and teachers, the city schools are trying to meet all these varied demands placed upon them.

Respectfully submitted,

H. C. SANBORN.

HIGH SCHOOL REPORT:

To the Board of Education:

The course of study which was adopted during the past year will indicate the work of the high school as it is at the present, and a copy of it is inserted.

The numerals indicate the number of recitations each week.

The entire school has music one period a week.

Drawing is an elective the last three years.

All pupils having any intention of entering college should elect a Latin course.

Pupils intending to enter the Normal school are advised to review algebra and geometry the last year.

Except for satisfactory reasons each pupil is required to take the full amount of work and not to change from one course to another.

Diplomas will be awarded to pupils completing any course.

When a pupil considers what subjects are to be studied in the high school, one of the principal questions to be decided is, whether Latin shall be elected or not, since this study continues throughout the course. Each pupil, if possible, should make this decision before he enters the school and not wait until the day of opening forces him to decide. Under the present course of study, out of 145 pupils enrolled, 84 have been studying Latin. This is nearly 58 per cent of the entire number. This percentage is an average one since, taking the country as a whole, over half of the pupils in the high schools are studying Latin.

The school has been granted the certificate privilege for three years by the New England college entrance certificate board. This means that pupils whose work entitles them to a certificate will be admitted to certain colleges without examination. In alphabetical order these colleges are as follows: Amherst, Boston University, Bowdoin, Brown, Dartmouth, Mount Holyoke, Smith, Tufts, University of Maine, Wellesley, Wesleyan and Williams. Other colleges, also, will enter pupils on certificate if special application is made.

There are numerous advantages connected with this manner of entering college, but with these advantages go certain requirements and responsibilities. One of the pleasant features is, that the good name of the school rests upon those that enter college in this way. For if their work in college is not of satisfactory grade, the school will lose the certificate privilege at the expiration of the time for which the privilege was granted. On the other hand certificates cannot be given to pupils who may not display sufficient scholarship in college. Those who do good work throughout their course in the high school are likely to have the same success in a higher institution, and those who do not exhibit persistence and secure success in their high school studies are not likely to change their habits later, even though it is possible. Accordingly it must be expected that certificates can be granted only to those pupils

that work consistently and know how to study well enough to be successful. Other pupils have the privilege of taking examinations in order to enter college.

These remarks apply with equal force to those who do not enter college. Life in college does not differ in its essential characteristics from life out of college. A high school fits for life somewhere, in college or out of college. Even more valuable than what is learned in school is the acquiring in school of the habit of overcoming mental difficulties and of securing efficiency in performing whatever tasks are attempted. These habits are important for all persons in all walks of life.

In this connection may be noticed the new regulation concerning honors. Hereafter all pupils attaining a rank of 90 per cent will be termed honor pupils and only two honor parts will be assigned, the valedictory and the salutatory.

The attendance is good. A careful inquiry is made into the reasons for all absences and there are very few that are unnecessary. There does not, however, seem to be the same desire to avoid being tardy. By the time a pupil reaches the high school age he should realize for himself that punctuality is a part of his school duties. The last commissioner of education of the United States has named three habits which he calls the fundamental school virtues. These are regularity, punctuality and industry. The influence of the home is of great value in developing punctuality and in preventing tardiness.

Three are other invaluable habits that the school can secure only by advice while the responsibility for developing them rests upon parents. Among these may be mentioned regular periods for home study, wholesome meals at stated times, sufficient sleep at seasonable hours, a reasonable regard for health, and exercise in the open air in all conditions of weather.

Respectfully submitted,

HARRY PREBLE SWETT.

MUSIC TEACHER'S REPORT.

Mr. H. C. Sanborn, Superintendent of Schools:

DEAR SIR: In the music department of our schools, we have been working during the past year upon the following outline of study. In the first and second grades many songs are learned by imitation, also the fundamental elements, such as the scale, simple scale successions and intervals.

Seat work with objects has been introduced in the first grades using nine inch splints to make the staff, and tablets or lentils for notes. In this way the first steps in number and proportion are taught to distinguish the lines and spaces.

In the second grades the work is made more progressive, as the children are taught to rule the staff upon paper, also to make the clef, bar, sharps and flats.

The practice then is to write the scales from a given do—also the divided scale.

This drill gradually gives place to independent sight reading through the nine keys in the middle grades.

In progressing simple time analysis is brought to notice, also the intermediate tones. Two part singing is practiced, as combined melodies through the use of the canon and the round. In the upper grades all imitative processes are abandoned and the study in three parts is an intellectual conception of the elements as a means of interpreting and reading music.

In the eighth grades special attention is given to the development of boys' voices, interesting them through the melodic character of the bass.

This plan of music work is based upon the Modern Music Series which was introduced into our schools last year.

Individual sight singing has been dwelt upon considerably through the use of the Weaver System. The children up to the sixth grade sing alone with as little embarrassment as in reading. They tell the key, take a relative pitch and give their own interpretation of the rhythm.

Their ideas may not always be correct, but great independence is gained through the effort. Tone and rhythm are also greatly strengthened by one child telling from the chart which exercise another is singing.

Songs which will appeal to the highest sensibilities of the child are placed upon the blackboards.

These songs not only develop power, but teach an appreciation of the best in music. It has always been the aim of the supervisor to bring such songs to the attention of the children as would tend to raise the standard in their minds.

There is so much to counteract at the present time, especially in the "canned music" of the phonograph that the ideal cannot be overdrawn.

The high school chorus is large with a small proportion of boys.

One discouraging feature is that so many pupils from other schools enter with no knowledge of sight reading. But this condition prevails everywhere. Reading at first sight may not always give satisfactory results, but a second sight should bring to the minds of pupils some intelligence.

For the first time in the history of the school there is a small orchestra made up of the following pupils: Hannah Kennedy and Frank Roberts, violins; Fred Perkins, clarinet. These young people are making a study of their special instruments and add much to the zest of the music period by their co-operation. Marion Parker is the faithful accompanist of the school at the present time.

The singing of the high school chorus at the last graduation was, in my opinion the best they have ever given.

They entered into the spirit of each selection and gave it with an appreciation of details which merited praise.

The rendering of "Love's Old Sweet Song," with the melody sung by the boys, has received many words of commendation.

The supervisor hopes that those who are interested in this branch of education, will visit the schools and judge for themselves of the progress and attainments of the pupils in the department of music.

Respectfully submitted,

ELIZABETH CLÉMENT.

Franklin, N. H., Jan. 23, 1907.

DRAWING TEACHER'S REPORT.

Mr. H. C. Sanborn, Superintendent of Schools.

This year the high school is especially fortunate in a large room devoted to drawing. Already an added interest is felt. There are classes in charcoal and water color. Twelve boys have been taking mechanical drawing. Two of which are taking advanced work. They are now working on intersection of solids.

There is great need of casts. Satisfactory work can hardly be expected with so few objects with which to work.

At present there are no pictures on the walls. Examples of the best in art should be selected with a great deal of care and thought.

The seventh grade has been provided with a new set of water colors. This makes three grades that now have paints. This number is altogether too small. Two more grades at least should have them.

I wish to express my appreciation to you and the teachers for the help and kindness which I have received.

Respectfully submitted,

DELLA I. BASSETT.

THE ROLL OF PERFECT ATTENDANCE FOR THE LAST SCHOOL YEAR.

DIRECTIONS FOR CLOSING SCHOOLS.

The fire alarm of the city will give three blows of the alarm to close the schools when in the judgment of the Board necessity demands it, as follows:

At 7.45 a. m. No forenoon session for schools below the 5th grade and ungraded schools.

At 8.15 a. m. No forenoon session for any of the schools.

At 11.30 a. m. One session. Schools in session remain until 1.30 p. m.

At 12.15 p. m. No afternoon session for schools below the 5th grade and ungraded schools.

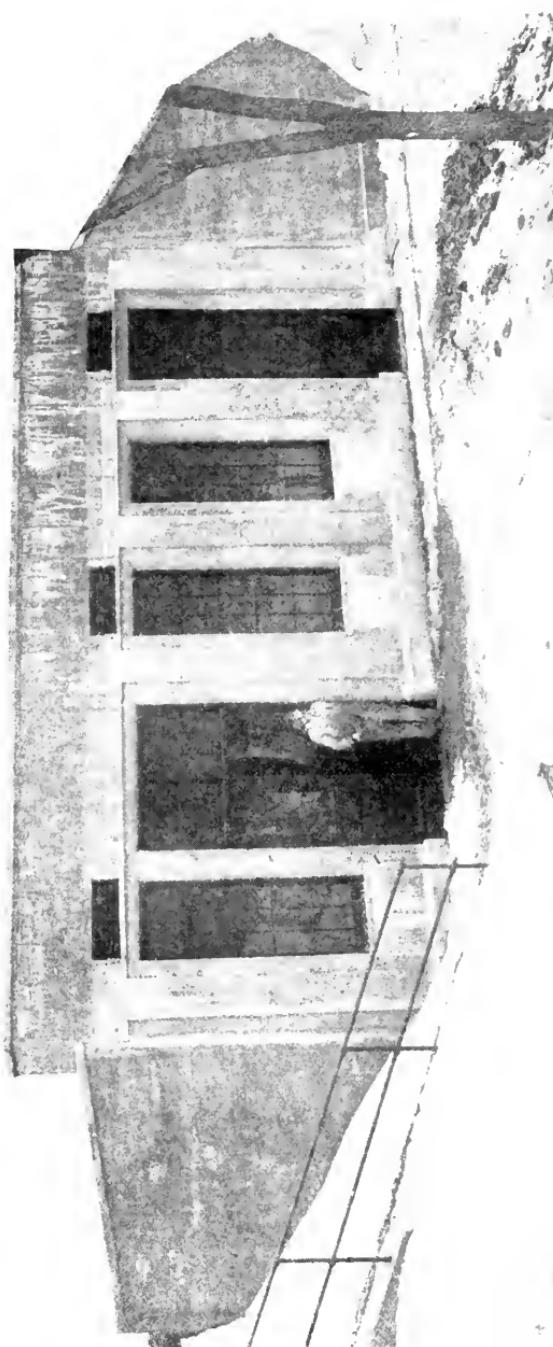

At 12.45 p. m. No afternoon session for any of the schools.

Three blows on the fire alarm, repeated at an interval of fifteen seconds, at any of the times mentioned above will affect schools at the Falls only.

When the signal is given at 7.45 a. m. or 8.15 a. m. and not repeated at 12.15 p. m. or at 12.45 p. m., there will be an afternoon session.

If at any time pupils appear at school, teachers who may be present, or the janitors of the buildings, are directed to care for them as may be necessary, and not turn them back before they have opportunity to get rested and dry.

Teachers will keep the pupils well informed of this arrangement and caution them to listen for the signal at the times mentioned, especially in stormy or severely cold weather.

FRANKLIN CENTRAL HEATING PLANT.

The Central Heating Plant.

ENGINEER'S REPORT.

The bad condition of the boilers in the High school and the fact that it was necessary for sanitary reasons to do away with the old Smead System in the Primary School, together with the desire of the Library Committee to dispense with the boilers in the new building led the Committee of the City Government to look into the advisability of heating these three buildings and the Memorial Building from a Central Plant.

Engineers were employed to look into the matter and report as to whether or not it was practical and economical to do so. After looking the ground over carefully a favorable report was made by them to the Committee, they recommending that the plant be located in the rear of the Library Building, where it was possible to so arrange the boiler house and coal pockets as to drive the coal teams on and dump the coal into the pockets without shoveling.

An appropriation of \$15,000.00 based upon the Engineer's estimate of cost was asked for and granted by the City Government. Contracts were let as follows:

For the boiler house, coal pockets and wing wall to Messrs. H. A. Hanscom & Company. For the boilers to the Brownell Company.

The furnishing and laying of all tile conduit and insulation to the H. W. Johns-Manville Co.

All piping in connection with the boiler house and buildings to the Kidder Machine Company.

The work was begun in the spring and completed so that all buildings have been heated through the cold weather successfully and economically from a Central Plant.

In the Primary school a system of heating and ventilation was installed, and in the other buildings simple connections to the existing systems of heating were made from the central plant.

A brief description of the plant is as follows:

The boiler house and coal pockets are constructed of concrete reinforced with expanded metal and twisted steel, as this construction was best suited to the underground work called for in this building.

The chimney built of brick is located at the rear of the Memorial building in such a manner as to be as inconspicuous as possible.

The size of the boiler house is 32 x 18 -4 and 13 feet in the clear. The coal pocket is 30x18x11 in the clear, the boiler house was built for the installation of two 60 Horizontal Tubular Boilers. The coal pocket was planned to hold 125 tons of coal.

In regard to the size of the boiler house and coal pockets, this matter was carefully gone into by the Engineers, and due consideration given to the amount of money to be expended and the work to be done. In view of the fact that all the extension contemplated in the future was limited to the possibility of larger buildings on the hill for school purposes it was not considered wise to spend a large amount of money in the

boiler house for room which neither now nor later would be necessary. The two boilers installed will be ample for any probable extension of the plant, as one boiler has been found to be sufficient in any weather to do the work without any forcing, thus leaving a spare boiler with a margin of unused capacity in the boiler which has been run for supplying heat this winter.

In regard to the size of the coal pockets which hold as above stated 125 tons of coal. The present rate of coal consumption is from something under one ton in moderate weather to one and one-half tons in severe weather, in twenty-four hours, therefore there is a storage capacity equal to the amount burned in three months of hard winter weather, and as it is practical for the city to make contracts during the summer months for the winter supply of coal, arranging to have it delivered at such intervals as would be necessary it does not seem as though it would have been wise to have involved an additional expenditure for more room in the coal pockets. The amount of coal which can be carried there now will provide for any blockade on the railroads or any weather conditions which would make it difficult to deliver coal from the depot to the coal pockets.

A larger boiler house and coal pockets would of necessity mean an extra investment of the city's money for no real gain in any way. This of course would mean an additional burden on every taxpayer which the Committee and Engineers did not think necessary.

The plant has been installed according to the plans and within the amount appropriated for the purpose. The chimney is so supported that instead of weakening the foundation of the Memorial building it has to a large extent strengthened it.

No unnecessary money was expended for ornamentation of the front of the boiler house, but it is neat and in keeping with the Library in front of it.

The underground steam distributing system consists of steam, flow, return, and drip pipes enclosed in Portland Sectional Conduit packed with Asbestos Sponge Filling, which it has been proved by experience to give the most complete insulation of any form of underground construction known. As the steam pressure in the boiler house and at the High school are practically the same it is evident that there is but a very small loss in carrying steam, in fact, this loss is not anything like the loss that would be due to the radiation from the individual boilers in the different buildings themselves.

The conduit crosses the highway and runs directly up the hill to the High school, from which a branch is taken to the Primary school, the supply to the Memorial hall being taken off from a pipe which runs through the cellar. The Library is taken from a separate branch from the boiler house and is controlled by proper valves in the boiler house. The conduit where it passes under the highway is encased in concrete, it being necessary to do this on account of the fact that heavy teams pass over it, and the conduit itself on account of the water level in the boiler house is much nearer the surface at this point than it is in the run up the hill, but this concrete re-inforcement is ample protection from any danger of breakage by traffic on the highway above.

Everything in connection with the plant, both the underground work and the boiler house itself is substantial and enduring construction. The methods used here were the same as those employed at Dartmouth College, Hanover, N. H., St. Paul's School, Concord, N. H., and the same as used at other large plants installed by the same engineers.

Respectfully submitted,

R. D. KIMBALL CO.

REPORT OF COMMITTEE.

Early in the spring of 1905 the question of the City's building a Central Heating Plant for its Memorial Hall, High School, Primary School and Library was brought to the attention of the City Council. The necessity of providing heating arrangements for the new Library, then in the course of construction and the fact that the boilers at the High School building having given out so it would be necessary to put in new ones within a short time, led to the agitation of the City's building a Central Plant for heating its public buildings. The City Council appointed a committee to investigate the matter and report to the Council. The committee reported favorable to the plant and recommended that the firm of Richard D. Kimball Co., Engineers of Boston, Mass., be authorized to make preliminary drawings and give an estimate of the cost of such a plant. The R. D. Kimball Co. submitted the plans authorized and estimated the cost of a Central Heating Plant and connections in all the buildings to be heated at \$14,500.

The Council of 1905 then voted not to construct the plant, notwithstanding that a petition representing a valuation of \$1,500,000, and signed by all the heaviest taxpayers and business men, had been presented requesting that the plant be constructed.

In February 1906 the matter of a Central Heating Plant was again brought before the Council and it was voted to build such a plant as recommended by R. D. Kimball Co., of Boston, Mass., at a cost not to exceed \$15,000 and a committee consisting of Mayor W. L. Whittier, George S. Davenport, Albert S. Eastman and Harry F. Davis were selected to have charge of the work. The committee organized with Mayor W. L. Whittier as Chairman, and Harry F. Davis as Secretary, and immediately started on the work before them. The

R. D. Kimball Co., Engineers of Boston, Mass., were engaged to complete drawings, make surveys and to have charge of the work.

As soon as the plans were prepared, bids were called for on each part of the work.

The plans called for the erection of a Boiler House, Coal Pockets, and Chimney, situated at the back of the city lot, between the Memorial Hall and Library, with the chimney so arranged as to show as a part of the Memorial Hall Building. The plans called for the bids under three separate contracts viz :

1st. Boiler House, Coal Pockets and Chimney and setting of Boilers.

2nd. Complete Central Heating System and apparatus as shown in plans of R. D. Kimball Co.

3rd. Two Horizontal Tubular Boilers of 90 H. P. each, 60 in. outside diameter and 14 1-2 feet long, delivered F. O. B. Franklin.

The bids received were as follows :

Boiler House, Coal Pockets, Chimney, etc.—

John W. Dresser, Franklin, N. H.,	\$6,496.00
H. A. Hanscom, Boston, Mass.,	\$5,500 00

Complete Central Heating System—

James Tucker & Sons Co., Boston, Mass.,	\$8,250.00
The G. M. Parks Co., Fitchburg, Mass.,	6,835.00
A. A. Sanborn, Boston, Mass.,	5,847.00
The Merrill Co., Boston, Mass.,	5,832.00
The Kidder Machine Co., Franklin, N. H..	5,687.00

The Boilers—

Robb-Mumford Boiler Co., Boston, Mass.,	\$1,192.00
Cunningham Iron Co., Boston, Mass.,	1,120.00
The Kidder Machine Co., Franklin, N. H.,	1,073.00
Scannell Boiler Works, Lowell, Mass.,	1,020.00
Brownell Co., Dayton, Ohio,	1,000.00

The contracts were awarded as follows:

Boiler House, Coal Pockets, Chimney and setting Boilers to H. A. Hanscom of Boston, Mass., for \$5,500.00. Complete Central Heating System to The Kidder Machine Co., of Franklin, N. H., for \$5,687.00. Boilers to the Brownell Co., of Dayton, Ohio, for \$1000.00.

The contract for the Boiler House and Coal Pockets called for re-inforced concrete construction.

The size of the boiler house is 32x18-4 and 13 in the clear, and of the coal pockets 32x18 and 11 in the clear. The capacity of the coal pockets is 125 tons of coal. The front of the building faces the plant of the Franklin Light & Power Co., and the Plant is so constructed that the top of the building which is also of concrete construction, is level with the grade of the land between the Memorial Hall Building and Library, and is so arranged that teams can be driven onto the Plant and the coal dumped directly into the pockets.

The chimney is of brick and is located at the rear of the Memorial Building so as to show as a part of the building. The chimney is 70 feet in height.

The Central Heating system called for the removal of the Smead Furnace in the Primary school, and the piping of the building throughout for steam, the changing over of the connections in the High School Building and the addition of some new piping, the connecting of the new library and the installation of a Gurney heater for the Memorial Building, together with the laying of the pipes from the Central Plant to each of the buildings to be heated.

The work was completed and the plant was put in operation November 3, 1906. The entire cost of the plant, including the Engineer's expenses and extra work found necessary to do that was not in the contracts, together with the concrete bank wall leading down from Memorial street and along the front of the building was \$13,813.00.

The plant was built for about \$700 less than the Engineer's estimate and \$1200 less than the appropriation, and the city has an up-to-date plant capable of heating all the buildings for which it was built and such as it may be necessary to add in years to come for school purposes.

We also include in this report a report of the Engineers in charge of the work.

Lighting Contract.

BETWEEN THE CITY OF FRANKLIN AND THE
FRANKLIN LIGHT & POWER CO.

This agreement, made this twentieth day of November, A. D., 1906, between the city of Franklin, a municipal corporation situate in the county of Merrimack and State of New Hampshire, acting by its mayor, Willie L. Whittier, and Milton B. Neal, Harry F. Davis, and Albert S. Eastman, a committee of the city council of said city of Franklin on lighting streets, duly authorized by vote of said city council to make and execute this contract as party of the first part, and the Franklin Light & Power Company, a corporation duly established by law and doing business at said Franklin, party of the second part:

Witnesseth, The said party of the second part, for the consideration hereinafter mentioned, agrees for itself, its successors and assigns, at its own expense to provide and maintain in the public streets, squares, alleys, lanes and other public places in said city, not less than fifty-five (55) arc electric lights of the capacity hereinafter mentioned; said lights to be increased in number as the said council of said city shall determine. Said electric lights to be of the standard 1200 candle power enclosed

arc lamps; to keep the same lighted from twilight to twilight upon every night of the year for the term of five (5) years from the first day of January, 1907, to the first day of January, 1912, it being understood and agreed that said second party in no case shall be obliged to extend its lines more than one-eighth of a mile for one arc lamp. The said party of the first part agrees to pay the said party of the second part for each of said lights furnished under this contract the sum of sixty-five (65) dollars per year, the same to be paid in monthly payments.

And the said party of the second part for the further consideration hereinafter mentioned, agrees for itself, its successors and assigns, at its own expense, to provide and maintain in the public streets, squares, alleys and lanes in said city, at such points in said city as the mayor and standing committee on lighting streets may designate, the following incandescent lights, and at the specified prices, viz.; not less than sixteen (16) thirty-two (32) candle power incandescent lights at fifteen (15) dollars per year each, payable monthly.

The said party of the first part agrees that the said party of the second part may maintain its present lines through and over the public streets, alleys and lanes of said city and erect such new lines as may be required. In any additional construction the said party of the second part agrees that all poles, set for the purpose of stringing or maintaining lamps in position, shall be of good quality Georgia Southern pine, old growth pine, white oak or chestnut. All poles erected of any kind shall be of a suitable height, but in no case shall said party of the second part be required to erect a pole more than forty-five (45) feet long; all poles shall be sawed square, have their sides planed, in size not less than eight (8) inches square at the base, and kept painted. The said party of the first part is hereby authorized to use the top on said poles that said party of the second part has erected, or may hereafter erect, for its system of fire alarm telegraph.

It is hereby understood and mutually agreed that all damages or injuries to such lights or lines arising from fire or other unavoidable causalties shall be repaired by the said party of the second part with reasonable diligence, and shall vitiate the contract, and that all damages to any person or property caused by poles, lamps, wires or other apparatus used by said party of the second part, or by the use of the same, occasioned by the negligence or want of care of the parties of the second part, or its servants or agents, shall be borne by the said party of the second part, that all liabilities, costs or damages from the maintenance of the system of electric lighting used by the party of the second part, shall rest upon said party of the second part. At the termination of this contract all property used by said party of the second part under the same shall remain the property of said party of the second part, its successors and assigns.

In witness whereof the parties have hereto signed in duplicate the day and date first mentioned.

Resolutions.

In the year of our Lord one thousand nine hundred and six.

A resolution relating to the appointment of Standing Committees of the City Council.

Resolved by the City Council of the City of Franklin, as follows:

That the Mayor be authorized to appoint the following Standing Committees of the Council, to be appointed, one from each ward, viz. :

On highways,
fire department,
police,
schools,
public buildings,
ordinances,
street lighting,
cemeteries,
finance, to consist of the Mayor and two members of the Council.

Approved.

WILLIE L. WHITTIER, *Mayor.*

Passed Jan. 1, 1906.

In the year of our Lord one thousand nine hundred and six.
A resolution relating to heating library.

Resolved by the City Council of the City of Franklin as follows:

That the Committee on the Public Library be authorized to expend not exceeding \$1500 on heating plant for the building, and so much thereof as may be necessary is hereby appropriated for that purpose.

Approved.

WILLIE L. WHITTIER, *Mayor.*

Passed Jan. 1, 1906.

In the year of our Lord one thousand nine hundred and six.

A resolution funding twenty-five thousand dollars of water works notes.

Resolved by the City Council of the City of Franklin as follows:

SECTION 1. That for the purpose of paying the twenty-five thousand dollars of notes for money borrowed for the extension of the water works system during the year 1905 and to fund the same, the city borrow the sum of twenty-five thousand dollars and issue bonds therefor; that the Mayor and City Treasurer be, and hereby are, authorized and directed to make, execute, sign and affix the seal of the city thereto, and issue, at not less than par and accrued interest, bonds of said city for said sum of twenty-five thousand dollars, in the form prescribed by chapter 43 of the laws of 1895; said bonds to be fifty in number, for the sum of 500 hundred dollars each, to be dated March 1, 1906, payable to bearer with interest coupons attached, bearing interest at the rate of three and one-half per cent per annum, payable on the first days of March and September in each year; the principal of said Bonds and the inter-

“st coupons attached to be made payable upon presentation at maturity at the First National Bank of Boston, Massachusetts; or at the office of the City Treasurer; the principal of said bonds to be made to become due and payable on the first day of March, A. D., 1916.

SECTION 2. That all of said bonds owned by citizens of said city of Franklin shall be exempt from taxation, as provided in Chapter 55, Section 14, of the Public Statutes.

Approved.

WILLIE L. WHITTIER, *Mayor.*

Passed Feb. 5, 1906.

In the year of our Lord one thousand nine hundred and six.

A Resolution relating to hiring money.

Resolved by the City Council of the City of Franklin as follows:

That the Mayor and City Treasurer, for the time being, are hereby authorized to hire money to pay the current expenses of the several departments, and any outstanding notes, bonds, or evidences of debt of the city becoming due, and to give promissory notes of the city therefor.

Approved.

WILLIE L. WHITTIER, *Mayor.*

Passed Jan. 1, 1906.

In the year of our Lord one thousand nine hundred and six.

A resolution relating to Geo. R. Stone's bequest.

Resolved by the City Council of City of Franklin, as follows:

Whereas, Geo. R. Stone, Esq., a former resident of this city and lately deceased, has by his last will made the follow-

ing bequest, to wit: "I hereby give to the city of Franklin at my wife's decease, the garden lot, so called, between View and Prospect streets, for a public garden or park, on condition that it be perpetually kept and cared for by said city as a public square or garden park, but not to be sold by said city or to be used for any other purpose. If the city shall decline to accept this legacy on the above named conditions or shall accepting it violate said conditions, then it shall revert to my estate and descend to my heirs at law."

Resolved, That the City Council gratefully acknowledges the kindly and generous interest of said donor in the future interest and welfare of the city as displayed by said legacy and hereby accepts the same.

Approved.

WILLIE L. WHITTIER, *Mayor.*

Passed Feb. 5, 1906.

In the year of our Lord one thousand nine hundred and six.

A Resolution relating to the construction of a heating plant.

Resolved by the City Council of the City of Franklin as follows:

That the city hereby votes to construct a heating plant on lot now owned by the city near the City Hall, substantially in accordance with plans furnished by Richard D. Kimball with such changes therein as may be hereafter fixed by the Council or a committee appointed by the Council.

That the City Treasurer be and is hereby authorized to borrow the necessary amount not exceeding fifteen thousand dollars (\$15,000) upon the credit of the city and issue bonds therefor.

Approved.

WILLIE L. WHITTIER, *Mayor.*

Passed March 5, 1906.

In the year of our Lord one thousand nine hundred and six.

A Resolution relating to Committee on construction of heating plant.

Resolved by the City Council of the City of Franklin as follows:

That a Committee of four, consisting of the Mayor and one Councilman from each Ward, to be appointed by the Mayor, to carry on the work of constructing the Central Heating Plant.

That said Committee is authorized to sell such part of the present heating apparatus as will not be of further use.

Approved.

WILLIE L. WHITTIER, *Mayor.*

Passed March 5, 1906.

In the year of our Lord one thousand nine hundred and six.

A Resolution relative to Library appropriation in regard to heating.

Resolved by the City Council of the City of Franklin as follows:

That the annual Library appropriation hereafter be charged with its fair proportionate part of the expense of heating to be determined by the Council.

Approved.

WILLIE L. WHITTIER, *Mayor*

Passed March 5, 1906.

In the year of our Lord one thousand nine hundred and six.

A Resolution relating to state aid for highways.

Resolved by the City Council of the City of Franklin as follows:

Resolved that from the money raised and appropriated for the repair of highways the present year that there be set apart for the permanent improvement of its many highways, seventy-five cents for each \$1000 of its valuation the previous year as required by Chapter 35, Session Laws of 1905 and be it further resolved that in addition to the sum set apart as aforesaid the City Council hereby appropriates and sets apart an additional sum equal to fifty per cent of the amount required to be set apart under Section 3 of said act for the purpose of being entitled to receive state aid under Section 4 of said act, also be it further resolved that the Mayor be authorized to sign an application for such state aid as the city may be entitled under said votes.

Approved.

WILLIE L. WHITTIER, *Mayor.*

Passed April 23, 1906.

In the year of our Lord one thousand nine hundred and six.

A Resolution relating to estimate of departments for the year.

Resolved by the City Council of the City of Franklin as follows:

That each department of the City Government through the committee having charge of said department be, and are hereby required to file with the City Clerk before May 16, a written statement of the necessary work to be done by said department for the year 1906, and the estimated cost of the same, and such recommendations for improvement as may seem to them for the best interest of the city.

Approved.

WILLIE L. WHITTIER, *Mayor.*

Passed May 5, 1906.

In the year of our Lord one thousand nine hundred and six.

A Resolution relating to raising money by taxation for the year 1906.

Resolved by the City Council of the City of Franklin as follows:

That the sum of fifty-two thousand, six hundred and thirty-five dollars and seventy-six cents be raised by taxation the present year and that the assessors be instructed to assess and levy a tax for that amount, viz :

State tax,	\$7,460 00
County tax,	9,485 76
School money by law,	11,190 00
Public library,	1,500 00
Bearing money,	297 83

And the sum of twenty-three thousand dollars to meet the current expenses provided for by the appropriations made and that the same be appropriated with the other revenues of the city to meet the same.

Approved.

WILLIE L. WHITTIER, Mayor.

Passed May 21, 1906.

In the year of our Lord one thousand nine hundred and six.

A Resolution in relation to the discount in the collection of taxes.

Resolved by the City Council of the City of Franklin as follows:

To such as pay their taxes on or before the first day of August next will be entitled to a discount of three per cent and the Collector shall give notice to all persons whose poll tax remains unpaid September 1 and if the same is not paid in

fourteen days thereafter twenty cents shall be added for such notice which fee shall be additional compensation to the collector.

Approved.

WILLIE L. WHITTIER, *Mayor.*

Passed June 4, 1906.

In the year of our Lord one thousand nine hundred and six.

A Resolution relating to furnishing the Library.

Resolved by the City Council of the City of Franklin as follows:

That it is inexpedient to appropriate any money for the furnishing of the Library at this time and that the matter be left to the Library Trustees.

Approved.

WILLIE L. WHITTIER, *Mayor.*

Passed June 4, 1906.

In the year of our Lord, one thousand nine hundred and six.

A Resolution laying out a public highway from Sanbornton town line to the old A. G. Morrison house, so called, near the new concrete dam on Salmon brook.

Resolved by the City Council of the City of Franklin as follows:

That the petition for the laying out of a highway from the Sanbornton town line to the A. G. Morrison house near Salmon brook be granted, in our opinion, for the accommodation of the public there being occasion for the same; and we therefore lay out a new highway as requested in said petition, fifty feet in width. The Franklin Light and Power Co., the

only owner of land over which said highway passes having waived all claim to land damages and having agreed to build a road acceptable to the Mayor and Highway Committee of the City of Franklin over said route without expense to the city no land damages are awarded.

Approved.

WILLIE L. WHITTIER, *Mayor.*

Passed Oct. 17, 1906.

In the year of our Lord one thousand nine hundred and six.

A Resolution discontinuing a highway leading from the Sanbornton town line to the dwelling house of Donald Vandyke in Franklin, N. H.

Resolved by the City Council of the City of Franklin as follows:

That the highway in said city leading from the Sanbornton town line to the dwelling house of Donald Vandyke laid out by the selectmen of the town of Franklin, N. H., August 31, 1833, be and the same hereby is discontinued.

Approved.

WILLIE L. WHITTIER, *Mayor.*

Passed Oct. 17, 1906.

Ordinances.

An Ordinance relating to sewers.

*Be it ordained by the City Council of the City of Franklin
as follows:*

Section 1. That the resolution of the City Council adopted May 10, 1895, relating to sewers, be and the same hereby is so far modified as to provide for a special assessment or charge only on such persons or corporations as have already, or may hereafter, connect with the new system of sewerage.

Sec. 2. That no person or corporation shall be required to connect with any sewer except by direction of the Board of Health of the city or the City Council.

See. 3. All persons who have already, or shall hereafter connect with the new system of sewerage, shall pay to the city the following sums, to wit: For each tenement of seven rooms or less, fifteen dollars; for each additional room in a tenement in excess of seven, two dollars.

Space in buildings occupied wholly or in part for stores, manufacturing, or other purposes than private barns, cellars and store houses or store rooms, or outbuildings, shall be reckoned and paid for on the basis of one hundred and fifty square feet of floor space as one room when connected with the sewer.

Sec. 4. All persons who have already connected with the new system of sewerage shall pay to the City Clerk the amounts for which they are liable under the provisions of

Section three within thirty days after the passage of this ordinance, with interest thereafter, and the City Clerk is hereby directed to collect the same.

Sec. 5. No person shall hereafter connect with any public sewer without first obtaining a permit therefor signed by the City Clerk and countersigned by the Highway Agent, and before such permit is issued to connect with the new system of sewerage such person shall pay to the City Clerk the sums for which he would be liable under the provisions of Section three.

Sec. 6. In any case where connection with a sewer is made by the Board of Health, through the neglect or refusal of the owner to comply with their orders so to do, the amount provided to be paid therefor in Section three shall become at once due and payable and collected by the City Clerk, but the City Clerk may issue a permit in such cases without prepayment.

Sec. 7. Every permit to connect with any public sewer issued by the City Clerk shall contain the name of the owner, the number of tenements and rooms in each for which the permit is granted, the location of the tenements and amount paid for such permit, a record of which shall be made by the City Clerk in a book kept for that purpose.

Sec. 8. All connections with any public sewer shall hereafter be made under the supervision of the Highway Agent and in accordance with his directions, and it is hereby made the duty of the Highway Agent to see that all such connections are securely made and in the safest and best manner, and that only proper pipe and other materials are used.

Sec. 9. No person or corporation shall deposit any garbage, ocal, filth or any substance having a tendency to obstruct the flow of sewage in any manhole, flush tank or sewer opening.

Sec. 10. All fixtures connected with private sewers leading to the public sewers shall be provided with suitable traps and strainers to prevent the introduction of all solids or anything that would obstruct the flow in the pipes.

Sec. 11. Any person violating the provisions of Sections five and eight, nine and ten of this ordinance shall be fined not less than twenty dollars.

Sec. 12. This ordinance shall take effect upon its passage.

Approved.

E. H. STURTEVANT, *Mayor.*

Passed May 4, 1896.

An Ordinance relating to building in the compact part of the city of Franklin, as follows:

Be it ordained by the City Council of the City of Franklin as follows:

Section 1. No buildings shall hereafter be erected on the north side of Central street, between Sanborn bridge and Daniell bridge, on the south side of Central street between Sanborn bridge and Church street, on Franklin street between Central street and Church street, except the same is constructed with solid outside brick walls at least twelve inches thick.

Sec. 2. This ordinance shall take effect upon its passage.

Approved.

E. H. STURTEVANT, *Mayor.*

Passed May 4, 1896.

An Ordinance relating to sewers and in amendment of an ordinance passed May 4, 1896.

Be it ordained by the City Council of the City of Franklin, as follows:

Section 1. Any person connecting with a public sewer, who will sign a written request therefor, may pay an annual rental or tax as follows: For each tenement of seven rooms or less, \$2. For each additional room, in a tenement, thirty cents payable in advance. The first payment when the permit is granted, subsequent payments to be collected by the Collector with other taxes.

Such rental shall cease whenever such party shall pay the fee heretofore prescribed and any sums due for such rental.

Sec. 2. This ordinance shall take effect upon its passage.
Approved.

E. H. STURTEVANT, *Mayor.*

Passed Nov. 2, 1896.

An Ordinance for the promotion of cleanliness in public streets and places.

Be it ordained by the City Council of the City of Franklin, as follows:

Section 1. No person shall distribute in any public highway, within the city, any printed hand-bill, circular, or advertisement of any kind.

Sec. 2. No person shall place, throw or deposit upon any public highway, within the city, or upon any sidewalk therein, any paper, garbage, waste or refuse matter of any kind.

Sec. 3. No person shall spit upon the floor of any public conveyance, shop, store, hall, church, school house, railroad station or other public building in said city, or upon the steps of said conveyances or buildings, or upon the sidewalk of any public street or way in said city.

Sec. 4. Any person convicted of any violation of either section of this ordinance shall be fined not exceeding ten dollars.

Sec. 5. This ordinance shall take effect from and after its passage.

Approved.

FRANK H. DANIELL, *Mayor.*

Passed October 2, 1899.

An Ordinance relating to cemetery trust funds.

*Be it ordained by the City Council of the City of Franklin,
as follows:*

Section 1. That Chapter 40, Session Laws of this state for 1899, in which it is provided that (section 1):

“Any town or city which now holds, or hereafter may hold in trust, by bequest or otherwise, any fund for the care of any cemetery or private lot therein, may pay the same into the town or city treasury, and so long as the same remains therein, said town or city shall pay thereon an annual income at the rate of three and one-half per cent., which income shall be expended in accordance with the terms of the trust by which said fund or funds is held.

(Section 2.) This act shall not be in force except in such towns and cities as by vote of the town, or City Council shall so elect.”

Be and hereby is adopted and in force in this city, and the City Council so elects.

Sec. 2. This ordinance shall take effect and be in force upon its passage.

Approved.

RUFUS G. BURLEIGH, *Mayor.*

Passed September 3, 1900.

An Ordinance in relation to the duties of the City Auditor.

Be it ordained by the City Council of the City of Franklin, as follows:

It shall be the duty of the City Auditor annually, in the month of December, to examine the accounts of the Collector of Taxes and to notify every delinquent tax-payer of the amount of his taxes remaining unpaid, by mailing to each in a sealed envelope a copy of this ordinance, together with a statement of the balance due as it appears upon the tax list.

Approved.

RUFUS G. BURLEIGH, *Mayor.*

Passed December 3, 1900.

An ordinance in relation to licensing dealers of junk.

Be it ordained by the City Council of the City of Franklin, as follows:

Section 1. That all dealers in old metals, rubbers, rags or junk of any sort shall be licensed.

The said license shall be issued by the City Clerk upon recommendation of the Mayor.

The cost of said license shall be three (3) dollars per annum, dating from April 1, for the year ensuing.

Sec. 2. That no dealer shall buy of any minor, under fifteen years of age, any old metals, rubber rags or junk of any sort, without written consent of their parents or guardian.

See. 3. Any person convicted of violating the provisions of sections 1 and 2 of this ordinance shall be fined a sum not exceeding twenty (20) dollars for each offense.

See. 4. This ordinance shall take effect upon its passage.
Approved.

RUFUS G. BURLEIGH, *Mayor.*

Passed April 1, 1901.

An Ordinance relating to the names of streets and their numbers.

*Be it ordained by the City Council of the City of Franklin,
as follows:*

Section 1. That the names of the streets of the city of Franklin shall be as indicated on the map in the annual report of the city of Franklin, of 1895, with addition of new streets and avenues since laid out with the following exceptions: That the southern section of Pemigewasset street, running east from North Main street, shall be known as Gerrish street. That the street running from Depot street to Franklin Heights shall be known as Summit street. That the street leading north from Summit street to Pleasant Valley shall be known as Valley street. That the street west of Valley street, leading south from Summit street, shall be known as Gilman street. That the street running north from Central street, near Republican bridge, to Cate brook, shall be known as Glenwood avenue. That

the street running northwest from Bow street over Cheney hill to Glenwood avenue, shall be known as Cheney street. That the street running west from Bow street past what is known as Davis' block to Glenwood avenue, shall be known as Glen street. That the section of Maple street, running north from foot of Willow hill, then east to that section of Maple street running north, shall be known as Willow street. That the section of Winnipiseogee street running south from Central street to that section running east, shall be known as River street. The street running east, then north from Franklin street, opposite Church street, shall be known as Ayles Court. That the section of High street east of the Franklin & Tilton R. R., shall be known as East High street, and that section west of said railroad shall be known as West High street. That the street running east from Memorial street to Smith street shall be known as Canal street. That the name of Peabody avenue shall be changed to Peabody place. That the name of Railroad avenue shall be changed to Railroad street.

Sec. 2. The Mayor and Council shall from time to time, as the convenience of the public may require, designate the numbers to be affixed to the buildings on the several streets and squares in the city, and shall designate the names of new streets when laid out. In all streets the odd numbers shall be on the right hand side, and the even numbers on the left hand side of the streets in the progressive order of numbering, commencing with the lowest numbers and proceeding therefrom with increasing numbers as follows: The numbering of North Main street shall commence at the southerly end at junction of Central and South Main streets. The numbering of all streets connecting with North Main shall commence at North Main street. The numbering of South Main street shall commence at the

northerly end at junction of Central and North Main streets. All streets connecting with South Main shall commence numbering at South Main street. The numbering of Summit, Wells and Salisbury streets shall commence at Depot street. The numbering of Valley and Gilman streets shall commence at Summit street. The numbering of Central street shall commence at the westerly end at junction of North and South Main streets. All streets connecting with Central street, except Bow and Pearl streets, shall commence numbering at Central street. Bow street shall commence numbering at what is known as Paper Mill square. All streets connecting with Bow street shall commence numbering at Main street. The numbering of South Main street shall commence at Glenwood avenue. The numbering of Pearl street shall commence at the southerly end. The numbering of Canal street shall commence at Memorial street. The numbering of School, West, High, and Winnipiseogee streets shall commence at River street. The numbering of Ayles Court and Grove street shall commence at Franklin street. The numbering of Railroad, Elkins and View streets shall commence at School street. The numbering of East High and Russel streets shall commence at Railroad street. The numbering of Spring street shall commence at Prospect street. The numbering of all streets running east from Prospect street shall commence at Prospect street. The numbering of all streets east of Prospect street running parallel with Prospect street shall commence numbering at the northerly end. All streets connecting with Sanborn street shall commence numbering at Sanborn street.

Sec. 3. Every entrance to a building fronting the street shall be designated by a separate number. In the residential portion of the city every lot with a twenty-five-foot front shall be designated with a separate number, and in the

business portion of the city every lot with a twelve and one-half-foot front shall be designated with a separate number. The business portion of the city is embraced within the following limits: North and South Main street between Webster and Depot streets, Central street between River street on the west and Bow street on the east, Smith, Canal, Memorial and Church streets and Franklin street from Central to School streets.

See. 4. Any person who shall affix or suffer to be affixed to or shall allow to remain upon any building, any different number from the one designated by the Mayor and Council, shall be fined not less than one or more than five dollars, and a like penalty for every day he shall suffer such building to be so numbered after his first conviction of violating the provisions of this section.

See. 5. That measurement of each street in the city shall be made according to provisions of section three of this ordinance, determining the correct number of every entrance as provided for in section three of this ordinance, and that a correct record of same shall be kept on file in the office of the City Clerk in a convenient manner for the reasonable use of the public at all times. That there shall be transmitted by the person authorized by the committee on ordinances to make said survey, a notice and statement giving name of the street, the name of the owner, the name of the occupant, and the number of the building, together with instructions for procuring and fixing same.

See. 6. That the owner of the property shall within sixty days after receiving said notice as per section five of this ordinance, cause to be affixed to every entrance of a building fronting the street, mentioned in said notice, a metallic or other suitable number at least two inches in height, and so situated as to be plainly visible at all times from the street.

Sec. 7. If the owner of any building, after receiving said notice as per section five of this ordinance, fail to comply with the provisions of section six of this ordinance, the said owner shall be fined not less than one or more than five dollars, and a like penalty for every day which the said owner shall neglect so to do after his first conviction.

Sec. 8. This ordinance shall take effect on its passage.

Approved.

RUFUS G. BURLEIGH, *Mayor.*

Passed April 1, 1901.

An Ordinance in relation to attendance of scholars.

*Be it ordained by the City Council of the City of Franklin,
as follows:*

Section 1. Any child in the city between the ages of six and sixteen years, without a regular and lawful occupation, who shall, except in cases of ill health, be absent from school more than one day during the space of any one month, unless excused by the teacher of the child, shall be fined not exceeding ten dollars for each offense.

Sec. 2. This ordinance shall take effect on its passage.

Approved.

RUFUS G. BURLEIGH, *Mayor.*

Passed May 13, 1901.

An Ordinance relating to fire alarms.

*Be it ordained by the City Council of the City of Franklin,
as follows:*

Section 1. When an alarm of fire has once been given upon the fire alarm system of the city, it shall be the duty

of the person giving the alarm to remain at the box in charge of the same until the arrival of some person detailed to guard such box, except when the fire is upon the premises of the person giving such alarm.

See. 2. No person shall ring in a second alarm except under the direction of an engineer of the fire department.

Sec. 3. The chief engineer, or in his absence one of the assistant engineers, shall at once, upon the sounding of an alarm upon the fire alarm system, detail some person to supervise and watch the box from which the alarm was given, and it shall be the duty of such person to remain at said box and protect the same from any person interfering therewith until he is relieved by said engineers.

See. 4. Any person violating the provisions of this ordinance or disobeying the orders of an engineer under it shall be liable to a fine not exceeding twenty dollars for each offense.

See. 5. This ordinance shall take effect on its passage.

Approved.

RUFUS G. BURLEIGH, *Mayor.*

Passed June 3, 1901.

An additional Ordinance for the promotion of cleanliness in public streets and places.

Be it ordained by the City Council of the City of Franklin as follows:

Section 1. No person or corporation in possession or control of any real estate adjoining a public street, shall place or permit to remain on the premises so occupied by him, any paper or waste matter or substance of any kind, in such

a position or place that the same can be carried by the wind upon a public street.

Sec. 2. Every person or corporation keeping for sale at retail on premises adjoining a public street, fruit, nuts, or other goods from which waste is liable to be thrown upon such street, shall keep the highway abutting on the premises occupied by him to the center thereof free and clear of waste substances and matter from such class of goods as are kept for sale by him at such store, and shall keep and maintain in a wholesome condition all such receptacles for waste matter as may be located by the city upon or adjoining the premises occupied by him.

Sec. 3. No person shall injure, disfigure, destroy or remove any receptacle for waste matter placed by the city upon any public street or place, or place therein any substance for which such receptacle was not designed.

Sec. 4. It shall be the duty of the city marshal and every policeman when on duty to see that this ordinance is strictly observed, and when unable to cause the removal of any such waste matter from the streets by the person depositing the same, he shall forthwith remove the same himself.

Sec. 5. Any violation of this ordinance shall be punished by a fine not exceeding ten dollars.

Sec. 6. This ordinance shall take effect on its passage.

Approved.

RUFUS G. BURLEIGH, *Mayor.*

Passed Aug. 5, 1901.

Resolved by the City Council of the City of Franklin, as follows:

That the following rule for governing the action of the Council be and the same hereby is adopted.

RULE 1.

No vote shall be adopted by the Council appropriating money, or incurring a debt exceeding five hundred dollars, at the same meeting at which the resolution is proposed, except by vote in favor thereof by seven members at least of the Council taken by a yea and nay vote.

Approved.

RUFUS G. BURLEIGH, *Mayor.*

Passed Nov. 4, 1901.

An Ordinance for the prevention of accidents upon the highways.

Be it ordained by the City Council of the City of Franklin, as follows:

Section 1. No person shall drive any horse upon the highways of the city with a cow-bell or any other thing attached to the horse, harness or vehicle, that makes an unusual noise and frightens horses.

Sec. 2. Persons directing automobiles or other vehicles propelled by motors upon the highways of the city, shall upon meeting or passing other vehicles drawn by horses, which are frightened thereby, come to a full stop or reduce the rate of speed to such extent as necessary to avoid accidents resulting from such frightened horses.

Sec. 3. Any person convicted of a violation of either section of this ordinance shall be fined not exceeding ten dollars.

Sec. 4. This ordinance shall take effect on its passage.

Approved.

HARRY W. DANIELL, *Mayor.*

Passed April 9, 1902.

An Ordinance in relation to removal of buildings.

*Be it ordained by the City Council of the City of Franklin,
as follows:*

Section 1. That no building or buildings in the city shall be moved through highways except by owner first obtaining permit from the City Council.

Sec. 2. This ordinance shall take effect on its passage.

Approved.

HARRY W. DANIELL, *Mayor.*

Passed Aug. 4, 1902.

In the year of our Lord one thousand nine hundred and four.

An Ordinance relating to billiard, pool and lunch rooms.

*Be it ordained by the City Council of the City of Franklin,
as follows:*

Section 1. No owner or manager of a public pool or billiard room shall allow his pool or billiard tables to be used after ten o'clock at night.

Sec. 2. Any person violating this provision shall be punished by a fine of ten dollars.

Sec. 3. No keeper of any eating place, lunch counter or room shall keep his place open after eleven o'clock at night.

Approved.

ISAAC N. BLODGETT, *Mayor.*

Passed March 7, 1904.

In the year of our Lord one thousand nine hundred and four.

An Ordinance relating to injury to the highways and other city property.

Be it ordained by the City Council of the City of Franklin, as follows:

Section 1. No person shall with any trenching tool or machine displace the surface of any highway within the city boundaries without permission from the Council or from the chief of the highway department, as the case may be.

Sec. 2. No person shall erect, raise or place any sign, billboard or other obstruction on or within any highway, nor shall any such person erect, raise, place or affix sign, billboard or advertisement on any lands of the city or any building thereon without consent previously obtained from the Council or head of the appropriate department.

Sec. 3. Any person violating any provisions of this ordinance shall be fined ten dollars for each and every offense.

Approved.

ISAAC N. BLODGETT, *Mayor.*

Passed May 2, 1904.

An Ordinance relating to pawnbrokers.

Be it ordained by the City Council of the City of Franklin, as follows:

SECTION 1. No person shall carry on the business of a pawnbroker, within the City of Franklin, unless he is duly licensed therefor by the Board of Mayor and Council. Said Board of Mayor and Council shall, upon application, issue licenses to do business as pawnbrokers to such persons as said Board deem proper; and such licenses shall be for

one year from their issue, but may be revoked at any time by said Board of Mayor and Council whenever in their opinion the public good requires. Such licenses shall designate the place where the person licensed may carry on his business, and he shall not carry on the business at any other place within the city; and the fee for such license shall be ten dollars per year.

SEC. 2. Every person licensed as aforesaid shall keep a book or record at his place of business in which he shall enter in English at the time of receiving the same, a minute description of any article left for pawn, particularly mentioning any prominent or descriptive marks on the same, with the name, age and residence, giving the street and number, where possible, of the person from whom he received it, noting also the day and hour and the amount paid or loaned thereon; and such book or record, and the articles left for pawn, shall at all times be open to the inspection of the Chief of Police or any person authorized by him. No person licensed as aforesaid shall directly or indirectly receive any article in pawn from any minor, knowing or having reasonable cause to believe him to be such, without the consent in writing of the parent or guardian of such minor. And all persons so licensed, when requested to do so by the Chief of Police, shall make a daily statement to him of the articles left with them for pawn.

SEC. 3. If any person shall do business as a pawnbroker without obtaining such license, or if any person licensed as aforesaid shall violate the other provisions of this ordinance, or any of them, he shall be punished therefor by a fine not exceeding ten dollars for each offence.

SEC. 4. This ordinance shall take effect upon its passage.
Approved.

GEORGE E. SHEPARD, *Mayor.*

Passed Nov. 6, 1905.

VITAL STATISTICS.
 To the City Council of the City of Franklin: In compliance with an act of the Legislature, passed June Session, 1887, requiring "clerks of towns and cities to furnish a transcript of the record of births, marriages and deaths, to the municipal officers for publication in the annual report," I hereby submit the following:

Date of Birth	Place of Birth	Name of the Child (if any)	Sex and Condition	Name of Father	Maiden Name of Mother	Color of Parents	Residence of Parents	Birthplace of Father		Birthplace of Mother		Age of Father	Age of Mother
